Why Hackathons?

fiitizens

school explained

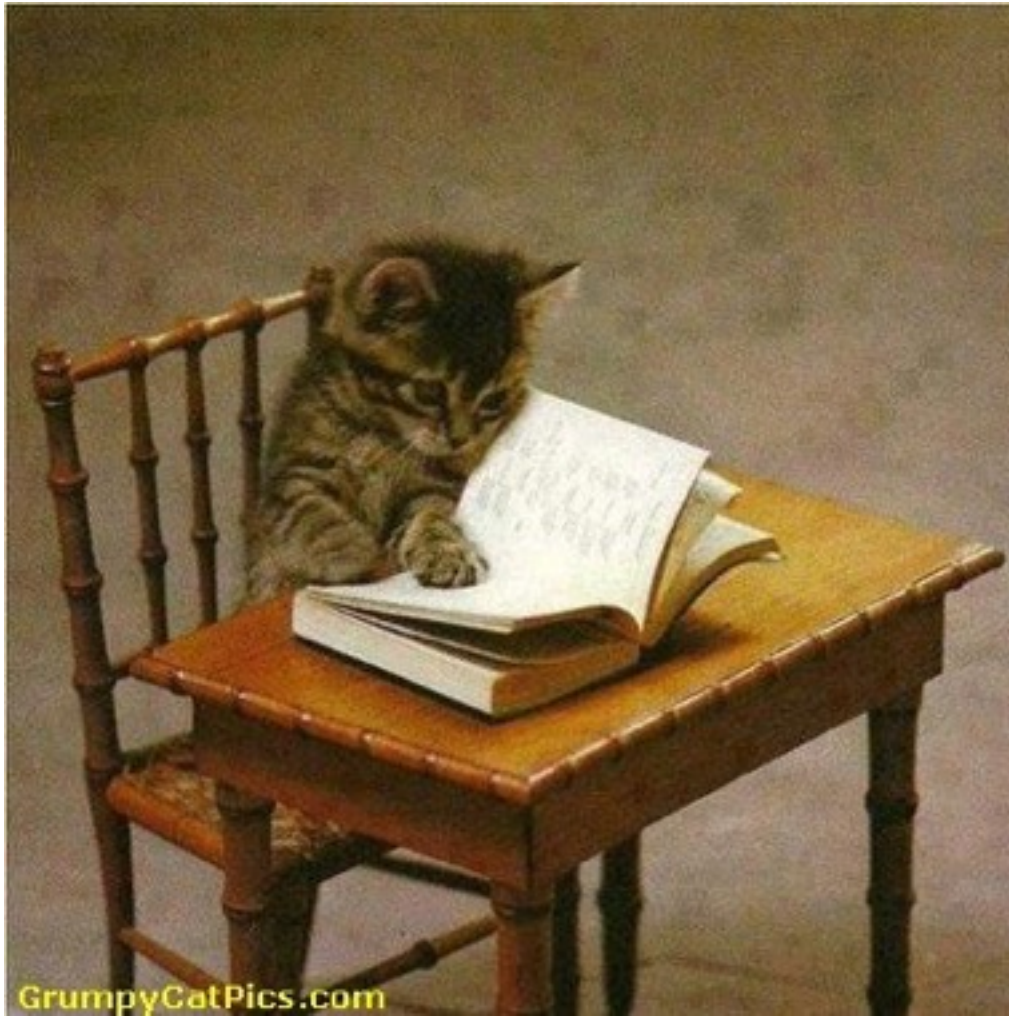

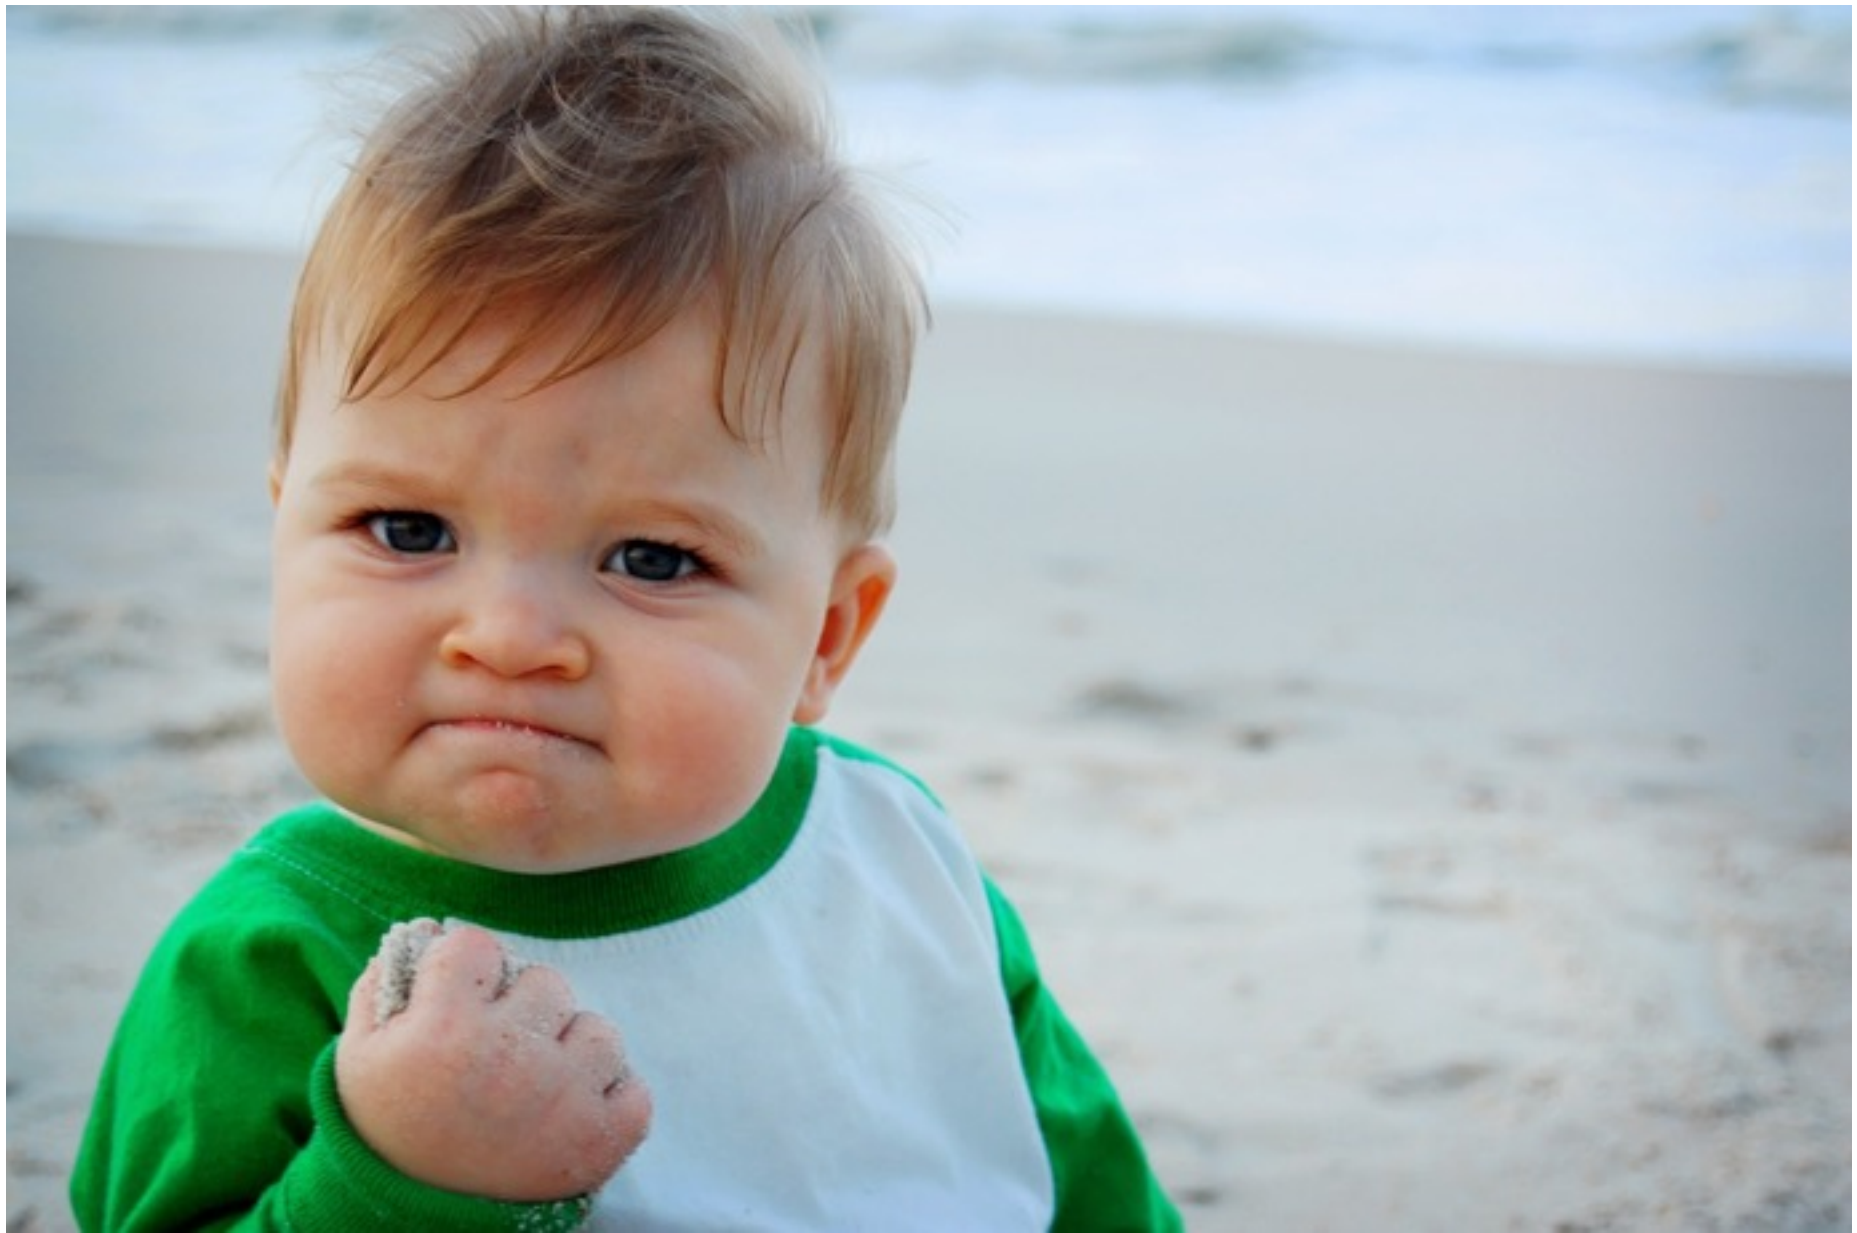

The Chartered Institute for IT
Enabling the information society

LSBU and BCS Women Android programming Family fun day Guinness World Record attempt

Knowing that we were working to a real brief and were going to potentially pitch back to the CEO focused me and my team.

I learnt about more effective ways to operate or run a business and I will consider broader fields when looking at jobs in the future.

Getting to understand the challenges real companies face was interesting and the difficulty of the brief was pitched right.

It's really improved my ability to solve problems for real life systems.

I enjoyed having to think through a real problem in a group and coming up with solutions.

75% of students said they got involved with Hackathons to improve their employability skills and to have evidence for their CV.

2015 and beyond
